

# Theodore Spence

## Chief Information Officer

Ted Spence joined EEDAR in February 2007 as the Director of Technology.

Responsible for the company's proprietary database infrastructure and analytical software, Ted designed and leads development on the company's technology supporting the collection of unique, factual research on electronic entertainment properties.

Prior to EEDAR, Ted acted as Director of Information Technology for Knowledge Adventure, where he created the company's IT infrastructure and operating policies following a divestiture. Among other management and consulting roles, he has developed honed his technology management skills at Vivendi Universal, Autobyte.com, eMemories.com, and AST Computer.

Ted's track record of delivering revolutionary products in a short time frame has driven his career towards proven and powerful extensible frameworks that provide a lasting competitive advantage.

Mr. Spence holds a Bachelor of Arts, Philosophy, from California State University, Fullerton.
